Software Engineer

WHO AM I?

Reliable, hard-working and organised, currently working as a software engineer at Verint, a global leader in CX Automation, after having completed a year in industry. Graduated with a 1st class BSc (Hons) in Computer Science from the University of Southampton. A volunteer group leader at Highfield Highreach Holidays and contributor to EvBoo, the leading event management and booking system for Scouts and Girlguiding.

PROFICIENCIES

Java / React.js / Web Development / SQL and Databases / Spring Boot / Cloud / Automation / CI/CD / Jenkins / Software Testing

EXPERIENCE

- 07/2023 – present **Associate Software Engineer (Since 07/2025)** **Verint**
Using technologies like React.js, Java, Spring Boot, SQL, and Jenkins, I deliver key customer-centric features and bug fixes across the Verint product suite, ready to be deployed onto both on-prem and cloud environments. I assumed new responsibilities, including managing and resolving bugs directly on deployed customer systems. Among several projects completed so far, I overhauled the test automation used in our team's development processes, transitioning from Reset Assured and Cucumber to Playwright, significantly increasing test efficiency and reducing pipeline run times by hours.
Agile Development / Java / React.js / Playwright / Jenkins / SQL / Cloud
- Development Graduate**
During my placement year, extending to one day a week in my final year, I made a real impact on the Verint WFO product by delivering 70+ useful time-saving features and critical bug fixes to customers. In particular, I focused on accessibility, replacing legacy Java interfaces with accessible, W3C compliant, React.js, vastly improving the customer experience. As part of my placement programme, I led the development of a KPI formula simulation feature that reduced customer time loss by days when creating new KPIs for employees.
Web Development / Java / Project Management / REST / Cloud / Communication
- 06/2022 – present **Developer and Event Support** **EvBoo**
Voluntary
Part of the development team that maintains the booking system and adds new features using ASP.NET Razor, MVC and LINQ. I also help to run and manage the system for a range of events, from large events with over 8000 attendees and over £1 million of financial transactions, right down to small events with less than 100 attendees, providing participant security using gate systems and wristbands and handling event admin.
Communication / Event Management / C# / ASP.NET Razor / Agile Development

EDUCATION

- 2021 – 2025 **Bachelor's Degree, 1st Class with Honours** **University of Southampton**
BSc (Hons) Computer Science, undertaking a placement year. My dissertation focused on designing and implementing a novel eLearning platform to teach web developers how to create accessible interfaces: [Learn Access](#).
Danaher Scholarship Program and recipient of the University of Southampton Netcraft Award (2022).
- 2019 – 2021 **A Levels** **Churcher's College**
A*A*A in Computer Science, Chemistry, Mathematics.

HOBBIES

I enjoy playing football and cricket for my local teams, while also running and hiking with friends or on my own. With Scouts, I have had the opportunity to go on many different expeditions and am proud to have achieved the Queen's Scout Award in 2022. Beyond sports, I like cooking and learning about the chemistry behind it, as well as problem-solving games and learning how and why things work.

VOLUNTEERING

I have volunteered with several organisations, having been an assistant Cub Scout leader at Haslemere Scout Group, responsible for planning and running weekly meetings covering all the skills required for the cubs to earn their Chief Scout Award badge. Through scouting is also where I also began my work for EvBoo. Since 2019, I have also volunteered at Highfield Highreach Holidays, leading a group of volunteers helping to provide a fun week-long residential holiday for young people with learning difficulties, physical disabilities, and medical conditions. This experience is greatly rewarding, not only giving the young people a great week but also giving the parents and families much-needed respite.
